CARE & MAINTENANCE GUIDELINES

**INSPIRE
DESIGN
LIVE**

Horizon Floors are finished with a penetrating hardening oil finish that is designed to protect the floor without a top surface film on your new beautiful hardwood floor. This allows the wood to give and take moisture in harmony with the environment around it. It also provides a dirt and wear resistant surface that will give you a life time floor without ever the need to sand.

AFTER INSTALLATION

If the floor needs to be covered to prevent wear and dirt penetration due to additional construction, use paper or cardboard. Do NOT tape paper or cardboard to the floor. After all Installation/construction work is completed. Vacuum the floor, then clean the floor thoroughly using the WOCA Oil-Refresher. WOCA Oil-Refresher is a high quality cleaning and maintenance product all in one, which combines gentle cleaning while adding a small amount of Maintenance Oil to the surface.

INITIAL CLEANING AFTER INSTALLATION

After the floor is installed it is recommended to clean the floor using 1 cup of WOCA Oil-Refresher mixed with 5 quarts of water.(250 ml to 5 liters of water) Mop the floor gently using a cotton mop etc. Leave the floor to dry for 1-2 hour before taken into use. Use WOCA Oil-Refresher White on white oiled floors and WOCA Oil-Refresher Natural on all other oiled floors. Please refer to After-Care Matrix below.

ROUTINE CLEANING

Perform weekly or monthly cleaning by vacuuming or sweeping. When the floors are dirty, use the WOCA Oil-Refresher in mixing ratio half a cup to 5 quarts of water (125 ml to 5 liters of water)

HALF CUP OF WOCA OIL –REFRESHER TO 5 QUARTS OF WATER

Dip the mop into the Oil-Refresher mixture and clean the floor with the light wrung mop. If the floors are very dirty, it is recommended to work with 2 buckets: one with the solution and one with rinse water. Then mop the floor lengthwise of the boards. Leave the solution on the floor briefly in order to dissolve dirt. Remove dirty Oil-Refresher residues with hard wrung mop and then rinse in bucket with rinse water. Always wipe floor with a hard wrung out mop in order to re-establish the protective WOCA Oil-Refresher micro film. Leave surface to dry for 1 hour before taken into use. Use WOCA Oil-Refresher White on white oiled floors and WOCA Oil-Refresher Natural on all other oiled floors. Please refer to After-Care Matrix below.

NEVER USE OTHER CLEANING PRODUCTS WHICH CAN DAMAGE YOUR OILED FLOOR.

REMOVING STAINS AND SCRATCHES

Light scratches are best repaired by hand rubbing WOCA Master Oil Natural or in some cases the matching WOCA Master Color oil on your floor on the affected area using a cloth.

Rub a small amount of WOCA Master Oil on the scratch. Leave the oil to absorb for a short period of time before removing the oil from the surface with a clean cotton cloth. Be sure to remove all of the oil on top of the wood. Allow to dry. Always soak oil stained rags in water before lying flat to dry. Then dispose in regular trash.

Very tough stains caused by red wine, coffee, etc. can be removed by using WOCA Spot Remover. Simply spray the Spot Remover on the spot and leave to dissolve. Wipe with a cloth. If necessary, repeat treatment. After removing the spot, the floor should be treated with the WOCA Master Oil.

FUTURE MAINTENANCE

Natural oil finished floors should never have to be re sanded. However, over time it is necessary to apply more oil to your floor. Traffic patterns or wear areas can be easily eliminated with this step. Typically in a residential application this is anywhere from 2 – 5 years after initial use of your floor. WOCA Maintenance Oil provides the floor with additional hard wearing properties. Use WOCA Maintenance Oil White on White oiled floors and Maintenance Oil Natural on all others. Follow directions on the label.

COMMERCIAL APPLICATIONS

General Recommendations

After installation in commercial areas (high traffic areas) your new floors should be cleaned with WOCA Wood Cleaner and polished with a coat of WOCA Master Oil. The WOCA Wood Cleaner is mixed in a ratio 1:40 (1/2 cup of WOCA Wood Cleaner mixed with 5 quarts of water). Using a damp mop, the floor should be mopped with the Wood Cleaner solution. Allow the floor to dry for 2 hours. The floor is now ready for a coat of Master Oil Natural (white for a white oiled floor). Work in 250-300sf sections. Using a thick white polish pad, pour a capful of oil into the center of the white pad and begin buffing the floor. Add small amounts of oil directly to the floor as needed. Once you have buffed the oil into a section, you must remove the oil from the surface. Using a clean white pad with a cotton cloth underneath, buff off any excess oil on the surface. Repeat this process with each section. Ongoing cleaning for commercial areas are Master Soap Natural. However, please contact the local WOCA specialist for a customized cleaning and maintenance schedule.

Display and Showroom floors are great ways to show the beauty and character of natural oiled floors. To ensure the floors last a long time and hold up to the constant flow of traffic in a showroom or model home we recommend treating these floors as a commercial application by using WOCA Master Oil after installation. We believe this is necessary to maintain the beauty and protect the investment of this application.

FREQUENTLY ASKED QUESTIONS

Can I use the hardwood floor cleaning product that I purchase at the grocery store?

No, use the WOCA Oil Refresher to clean your oiled floors to protect and nourish your floors.

How often do I need to clean my floors?

Clean the floors when they are dirty. This could mean weekly for some and monthly for others. Use the WOCA Oil Refresher for your regular cleaning.

My floors don't look like they have any finish on them. Is this normal?

Your floors have been coated with hardening penetrating oil that protects the wood from the inside. They are not designed to have a film finish on the surface. Your natural oiled floor will last a lifetime with a small amount of care.

Our Environment

WHY HORIZON FLOORS?

Horizon Floors is a leading manufacturer and trusted provider of quality wood flooring products in North America. We are committed to redefining the look of floors and beautifying interior spaces, offering product value, sustainable flooring solutions and incredible style options.

Quality Products

All of Horizon's flooring products are backed by a 30 year limited warranty.

Sustainable Options

Horizon Floors is dedicated to practicing sustainable forest management, helping preserve today's forests for the future. Our floors are made using less raw harvested wood materials than other floors.

Form & Function

Horizon Floors are made for life. Designed for you and your busy lifestyle, Horizon Floors are durable, versatile and beautiful. Horizon Floors are available in a wide array of styles and colors to suit your design style.
